

EKA | FRICTIONLOCK

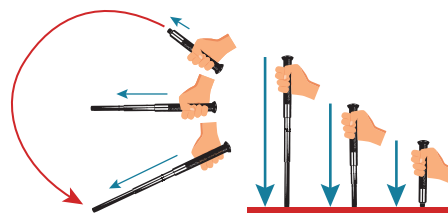

Expandable batons are extremely effective defensive tools used to block, restrain and subdue an attacker. Often times, simply deploying an expandable baton is enough to deter an assault.

The concept is very simple: In the closed state, the baton is held in position by a spring, and by means of a flinging motion, the baton is extended to its full length.

In this position it locks by its proven friction lock system.

Now it works like a conventional baton. To close the baton, the tip must be pushed onto the ground to allow it to close.

Key Features:

- Precision Engineering:** Crafted with meticulous attention to detail, our baton is designed to meet the rigorous standards of law enforcement professionals. It's a tool you can trust when you need it the most.
- Friction Lock Mechanism:** With a quick flick of the wrist, our friction lock baton extends instantly, locking into place for immediate use. The dependable locking mechanism ensures stability and reliability in high-pressure situations.
- Compact and Portable:** The baton is conveniently compact when retracted, making it easy to carry on your duty belt or store in your vehicle. When extended, it provides an impressive reach for maintaining control.
- Non-Lethal Force:** Our baton is designed to help you maintain control and protect yourself and others, with a focus on minimizing harm. Non-lethal striking techniques allow for effective suspect restraint without unnecessary aggression.
- Durable Construction:** Built to withstand the rigors of law enforcement work, our baton features a rugged, high-quality construction that can handle the demands of your job.
- Comfortable Grip:** The handle is ergonomically designed for a comfortable and secure hold, allowing you to maintain control in various situations.

Rely on the quality and reliability you've come to expect from Bonowi Hart Armour. Our Friction Lock Baton will be your faithful partner in maintaining peace and order. This is a tool you can count on when it matters most.

Equip yourself with the best affordable telescopic baton from Bonowi Hart Armour.

EKA FRICTIONLOCK	21"
Weight in g	530
Length closed	215 mm
Length expanded	535 mm
Material Tubes	42CrMo
Hardness	HRC48
Diameter Griptube	28 mm
Diameter Middletube	21 mm
Diameter Endtube	16.3 mm
Diameter end tip	21.5 mm
Article No.
